» Recent Projects

- <u>Portfolio</u> Personal site created to showcase front and back-end projects created using various development frameworks such as Angular JS and Socket.io. Challenged with CSS styling to structure the elements of the page, different formats were implemented before reaching the current structure. Github Repo
- Revelry Festival Finder Application created with a team of developers that utilizes AngularJS and JavaScript to access the Google Maps API so that users can find local music festivals with corresponding information. Overcoming the different dynamics of the team and pair-programming was valuable learning experience as a web developer. Github Repo
- <u>Weather Widget</u> Interactive widget that accesses the JSON files of a weather API to allow the user to search for current weather information. Understanding and navigating through the API, followed by application of the given information key to achieving functionality. <u>Github Repo</u>
- <u>Black Jack</u> Game created using jQuery and vanillaJS to create an interactive experience for the user as they try to win Blackjack!!! The dynamic display of the cards being dealt uses CSS transitions and the player is able to place bids, Hit and Stand, in order to beat the computer during the game. Once a winner has been identified, the player may reset the game to play again as desired. <u>Github Repo</u>
- <u>Sheena's Pickles & Jams</u> An Ecommerce site utilizing frontend and backend frameworks and technologies. User information was stored into the database using MongoDB after using directives from AngularJS to target and store the user input. Express routes were implemented to "get" and "post" user selections which were retrieved from the cookies before using the Stripe API to checkout. Github Repo
- <u>Chat App</u> The implementation of Socket.io allowed users to share drawings and chat to other people in real-time. Overcoming the obstacle of cross-platform integration so that new users could enter the chat room involved the creation of arrays to push the new information into so that other users in the chat any see the activity each other. <u>Github Repo</u>

» Career History

Abu Dhabi Education Council- Al Foaa Cycle 2 school, Abu Dhabi, UAE *English Medium Teacher-Math*, 2013-2016

- Created a Wikispaces online webpage that allowed students to receive notes from class, afterschool Q&A opportunities and access to resources related to the lessons.
- Implemented pedagogy and assessment practices with the use of online and mobile applications catered to the productivity of the teacher while allowing student to be actively engaged with the use of technology.
